

## AXIS PRODUCT OUTLINE

### Company/ Brand History

#### **Axis Australia - Mission Statement**

Axis Wake Research is dedicated to advancing wake sports and bringing an unrivaled level of performance, simplicity, and style to the value based boat segment.

Axis has come to fruition in Australia by strong customer and dealer demand for a simple, transparent cost effective boat that can produce tournament style wakeboarding wakes.

- Although Axis has a very unique design and focus it is still owned, operated, and manufactured by Malibu Boats Pty Ltd.
- Where Malibu will always push the limits of technology and boating innovations, Axis will strive to keep costs down through simplicity, cost conscious engineering and lean manufacturing methods.

### Pricing

- The Proposed Recommended Retail price is \$ 68,499 inc GST with the following ***important*** standard features :
  - Indmar AR 335 horsepower engine
  - Board Racks
  - Bimini
  - ChillAX Center Flip up Seat
  - Oversized stainless cupholders
  - Rear SKYBOX seating
  - LED storage lighting
  - Above Engine storage bin
  - Insulated cooler bag
  - Wakebox ballast system
  - Four Blade Wake Prop 14.5 x 14.25
  - Cruise control
  - Fiberglass Swim step
  - Swivel Driver's Seat
  - Dripless Shaft Seal
  - Mirror
  - FatAX wakeboard tower
  - Galvanised Tandem axle trailer with disc brakes and Electric Breakaway Dexter system

## Basic Technical Info

- The A22 is 22 feet long / 6.7 m
- The A22 is US Coast Guard rated for 13 people.
- Dry weight of the boat is around 1,681 kg.
- The wingless windshield was designed to:
  - Separate the look of the A22 from all other boats on the market.
  - Give the driver easy access to the dock from the driver's seat while docking the boat.
  - Allow the driver to talk to a rider in the water without having to stand up and speak over the windshield.
- Axis uses Malibu's tried and true, shift by cable / throttle by wire, system.
- The speed control uses a through-hull paddle wheel and can be set to use MPH or RPM.
- Indmar recommends premium octane, unleaded fuel in both the AR 335 and Raptor 400 engine options.

## Options

- The A22 comes **STD** in the Solid Gel Package with the choice of either graphite, white, and black. The remaining 3 colours being Laser Red, Electric Yellow & Chill Blue will be available in this STD solid format at an additional cost. There are another 3 optional gel coat configurations available, these are: Tricked Out, Straight up & Flip Side. Choosing of these 3 configurations will attract an additional charge.
- There are many options available but the most common questions we receive deal with the items below:
  - Plug N Play ballast adds three additional fat sacs (590 kg more) to the standard 409 kg sub floor hard tank system.
  - The bags will be on both sides of the engine in the aft storage area and under the play pin seating in the bow.
  - The bags will be on both sides of the engine in the aft storage area and under the play pin seating in the bow.
- The Auto-set Wedge option allows the user to deploy the wedge from the platform. As the boat runs at various speeds the Auto-set Wedge will automatically move to the point of optimum resistance to create the maximum wake size.
  - Power wedge is not available on the A22 to keep costs down.

- There are two sound pack options for the A22.
  - Sound pack I includes a splash proof Sony head unit, MTX 400 watt amp, and 6 MTX in boat speakers.
  - Sound pack II includes a splash proof Sony head unit, MTX 400 watt amp, MTX 600 watt amp, 12" MTX sub, 6 MTX in boat speakers, 4 MTX tower speakers and a transom remote.
- The splash proof Sony head unit includes a cable that allows for IPod, Iphone, MP3, or memory stick hook up.
- Snap out carpet or snap out synthetic tatami mat are available.
  - This is 100% synthetic material that is water, mold, stain and heat resistant.
  - Easy to maintain and clean.
- ChillAX seating allows the walk through filler cushions between the cockpit and bow to be folded up to make extra back rests.
- For 2010 Axis is offering an Indmar Raptor 400 Saltwater horse power engine option.

### **Construction and Production**

- Axis is using a true monocoque construction to provide a solid deck-to-hull bond, ensuring the longevity of our product and a smooth stable ride.
- Axis uses a "deck liner" design which adds rigidity and durability to key interior features.
- We manufacture all of our own towers to keep costs down and allow for rapid design and functionality changes.
- Our facility has its own machine shop to create and produce parts rapidly at the lowest cost. This form of vertical integration is one way that Malibu and Axis are committed to keeping costs down to the consumer and better control quality of components.

### **A22 Specs**

Base Proposed Recommended Retail: \$68,499

Length: 22' / 6.7 m

Beam: 100" / 2.54 m

Weight: 1,681 kg

Weight on trailer: 2,300 kg

Draft: 27"

Fuel: 181 L

Capacity: 13

STD Horse Power: Indmar AR 335

Prop: CNC 4-blade wake prop 14.5 X 14.25
